For: HIGH-FREQUENCY SWITCH CIRCUIT,)
HIGH-FREQUENCY SWITCH MODULE AND)
WIRELESS COMMUNICATIONS DEVICE)
COMPRISING IT)

Assistant Commissioner for Patents
Washington, DC 20231

Sir:

PRELIMINARY AMENDMENT

Prior to the examination of the above application, please amend the captioned accompanying application as directed below:

IN THE CLAIMS:

Amend the pending claims 8-11, 14, and 16-18, to read as follows:

8. (Amended) The high-frequency switch circuit according to any one of claims 1-6, wherein each of said transmission lines has a line length of $\lambda/10$ - $\lambda/4$.

9. (Amended) The high-frequency switch circuit according to any one of claims 1-6, wherein said first and second bandpass filters are surface acoustic filters, laminate-type dielectric filters, coaxial resonator filters or bulk wave filters.

00144110 002001

10. (Amended) The high-frequency switch circuit according to any one of claims 1-6, wherein an unbalanced output-type surface acoustic filter is used for a bandpass filter of said branching circuit, and a balun having an unbalance-balance conversion function is connected to the output of said unbalanced output-type surface acoustic filter.

11. (Amended) The high-frequency switch circuit according to any one of claims 1-6, wherein a diode is used for said high-frequency switch.

14. (Amended) A high-frequency switch module comprising the high-frequency switch circuits according any one of claims 1-6, for handling a plurality of transmitting/receiving systems of different passbands, wherein each high-frequency switch circuit comprises a phase shifter, a bandpass filter and first and second filter circuits each constituted by a transmission line and a capacitor.

16. (Amended) A wireless communications device comprising the high-frequency switch module according to claim 14.

17. (Amended) A mobile phone comprising the high-frequency switch module according to claim 14.

18. (Amended) A mobile phone comprising the high-frequency switch circuits according to any one of claims 1-6, and voltage control circuits for supplying voltage for determining the operation mode of said high-frequency switch circuits.

REMARKS

The present amendment is intended solely to correct improper multiple dependency of several claims, namely claims 8-11, 14, and 16-18, to ensure prompt examination of all claims 1-18.

APPENDIX A

8. (Amended) The high-frequency switch circuit according to any one of claims [1-7] 1-6, wherein each of said transmission lines has a line length of $\lambda/10$ - $\lambda/4$.

9. (Amended) The high-frequency switch circuit according to any one of claims [1-8] 1-6, wherein said first and second bandpass filters are surface acoustic filters, laminate-type dielectric filters, coaxial resonator filters or bulk wave filters.

10. (Amended) The high-frequency switch circuit according to any one of claims [1-8] 1-6, wherein an unbalanced output-type surface acoustic filter is used for a bandpass filter of said branching circuit, and a balun having an unbalance-balance conversion function is connected to the output of said unbalanced output-type surface acoustic filter.

11. (Amended) The high-frequency switch circuit according to any one of claims [1-8] 1-6, wherein a diode is used for said high-frequency switch.

14. (Amended) A high-frequency switch module comprising the high-frequency switch circuits according any one of claims [1-11] 1-6, for handling a plurality of transmitting/receiving systems of different passbands, wherein each high-frequency switch circuit comprises a phase shifter, a bandpass filter and first and second filter circuits each constituted by a transmission line and a capacitor.

16. (Amended) A wireless communications device comprising the high-frequency switch module according to claim [14 or 15] 14.

17. (Amended) A mobile phone comprising the high-frequency switch module according to claim [14 or 15] 14.

18. (Amended) A mobile phone comprising the high-frequency switch circuits according to any one of claims [1-11] 1-6, and voltage control circuits for supplying voltage for determining the operation mode of said high-frequency switch circuits.
